DETAILED ACTION

Allowable Subject Matter

1. Claims 1-36 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose a combination of steps in a method for persisting virtual private network structures across multiple network addresses assigned to a mobile node, including transmitting, by the mobile node, a binding update to the virtual private network tunnel server specifying the new network address; and creating a mapped relation from the new network address to the home address for the mobile node and transmitting the home address and the new network address using a message packet with an extension header, thereby facilitating continued use of virtual private network structures that are based upon the home address for the mobile node, as in claim 1;

creating a mapped relation from the new network address to the home address for the mobile node, thereby facilitating continued use of virtual private network structures that are based upon the home address for the mobile node by selectively processing received packets within a tunnel driver of an intermediate protocol stack layer of the mobile node, the processing within the tunnel driver being bypassed when the mobile node is connected in the home network, as in claim 12;

facilitating continued use of virtual private network structures that are based upon the home address for the mobile node by selectively processing received packets within a tunnel driver of an intermediate protocol stack layer of the mobile node, the processing within the tunnel driver being bypassed when the mobile node is connected in the home network that are

based upon the home address for the mobile node by selectively processing received packets within a tunnel driver of an intermediate protocol stack layer of the mobile node to replace the new network address with the home address in a destination field of the message packet, the processing within the tunnel driver being bypassed when the mobile node is connected in the home network, as in claim 21; and

transmitting the home address and the new network address using a message packet with an extension header; and creating a mapped relation from the new network address to the home address for the mobile node, thereby facilitating continued use of virtual private network structures that are based upon the home address for the mobile node by replacing the new network address with the home address, as in claim 29.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
